

TACOTHERM FRESH MEGA3 (C/CL)

CENTRALISED HIU WITH HIGH-EFFICIENCY PUMPS

ADVANTAGES

Compact and versatile

- Models: with and without circulation pump, dual-zone return stratification
- Cascading possible

Secure

- Integration in building control system via optionally available eLink ModBus RTU interface
- Integrated safety subassembly and soft-close valves

Simple

- Valves and components are fully preassembled and ready for connection

Efficient

- Simple and fast commissioning

Centralised heat interface unit for hygienically heating drinking water in accordance with the continuous flow principle with innovative regulation technology

DESCRIPTION

The TacoTherm Fresh Mega3 (C/CL) is a centralised heat interface unit used for on-demand preparation of domestic hot water in accordance with the continuous flow principle. It retrieves the heat from the storage tank of an existing or new heating system, which uses solid-fuel boilers, heat pumps, solar systems, etc. as a heat source. The station replaces the storage of hot drinking water and thus provides a high degree of protection against Legionella by avoiding water stagnation.

INSTALLATION POSITION

Vertical wall-mounting in the vicinity of the hot water storage tank or on the tank itself.

OPERATION

Drinking water is heated to the defined dispensing temperature in the TacoTherm Fresh Mega3 (C/CL) in accordance with the continuous flow principle. The integrated heat exchanger is supplied with as little hot water from the storage tank as is required to maintain a constant dispensing temperature.

The latest pump and regulation technology is used. In recording the temperature difference and flow rate data, the electronic regulator simultaneously records and stores the quantity of heat consumed. In addition to an additional circulation pump that can be installed, the TacoTherm Fresh Mega3 (C/CL) can also be supplied with a switching valve for dual-zone return stratification. The primary pump, circulation pump as well as load valve are controlled by the integrated regulator in accordance with specifications.

BUILDING CATEGORIES

- Apartment blocks
- Housing estates
- Multiple dwelling units
- Smaller public buildings
- Facilities with partial use – for example barracks, camping sites, etc.

TECHNICAL DATA

General

- TacoTherm Fresh Mega3 controller
- Weight (empty): 17.5 – 20 kg
- Overall dimensions (incl. hood):
W 470 mm × H 685 mm × D 193 mm

Material

- Base plate: Galvanized sheet steel
- Rear panel and hood: EPP design insulation
- Pumps:
 - Primary: Cast steel
 - Secondary: PPS (plastic, approved for drinking water)
- Valve housing: Brass
- Pipes: DN 20 stainless steel 1.4404
- Plate heat exchanger:
 - Plates and connector pieces: Stainless steel 1.4401
 - Heat exchanger solder: 99.99 % copper (on request: stainless steel solder)
- Seals: AFM flush seal

Primary side

- Operating temperature $T_{0\ max}$: 95 °C
- Operating pressure $P_{0\ max}$: 10 bar
- Primary pump: TacoFlow3 GenS 15-85/130 C6 DS P

Secondary side

- Operating temperature $T_{0\ max}$: 85 °C
- Operating pressure $P_{0\ max}$: 10 bar
- Safety valve (intrinsic safety): 10 bar
- Circulation pump: TacoFlow2 Pure C 15-40/130 C6

Electrical connection data

- Mains voltage: 230 VAC ± 10 %
- Mains frequency: 50...60 Hz
- Power consumption: max. 250 W
- 3.5 AT fuse
- eBus interface
- Protection type: IP 40

Flow media

- Heating water (VDI 2035; SWKI BT 102-01; ÖNORM H 5195-1)

APPROVALS / CERTIFICATES

- Components in contact with potable water comply with UBA Evaluation Criteria 26/03/2018 and Directive (EU) 2015/1535
- SVGW: 1808-6783

TYPE OVERVIEW

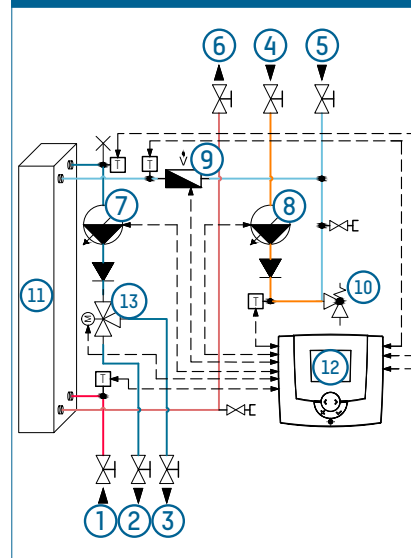

TacoTherm Fresh Mega3 | Centralised heat interface unit

Order no.	Rp 3/4"	Rp 1"	Version	Version
272.2026.000	⑤ ⑥	① ②		Without circulating pump, without dual-zone return stratification
273.2226.000	⑤ ⑥	① ③ ④	C	With circulating pump, without dual-zone return stratification
273.2229.000	⑤ ⑥	①-④	CL	With circulating pump and dual-zone return stratification

DIMENSIONAL DRAWING

PRODUCT DIAGRAM

- Primary hot water flow
- Primary hot water return 1 (integration of storage tank in center in CL models)
- Primary hot water return 2 (integration of storage tank below)
- Circulation [C/CL version]
- Cold water connection (3/4")
- Hot water connection
- Primary pump
- Circulation pump [C/CL version]
- Flow rate sensor
- Safety valve
- Heat exchanger
- Regulator
- Switching valve [CL version]

**FLOW AND PRESSURE LOSS DIAGRAMS
COLD WATER HEATING AT 50K (10 ... 60 °C)**

D) Secondary pressure loss

- 1 Pressure loss for cold water and circulation (secondary)
- 2 Circulation pump min
- 3 Circulation pump max
- 4 Primary pressure loss
- 5 Pump characteristic primary side

C) Return temperatures

A) Cold water heating at 50K

B) Residual head | Primary pressure loss

EXAMPLE FOR INTERPRETING THE FLOW RATE AND PRESSURE LOSS DIAGRAMS

Given

- Hot water dispensing volume: 22 l/min
- Primary heating flow temperature: 70 °C

Sought

- Hot water demand (l/h)
- Primary heating return temperature in °C
- Secondary pressure loss in mbar
- Primary pressure loss in mbar

Approach

- In Diagram A) the hot water demand at the intersection point of the dispensing volume of 22 l/min and primary flow temperature of 70 °C is 1700 l/h.
- In Diagram B) the primary pressure loss for a hot water demand of 1700 l/h is 450 mbar. The pump delivery head is 550 mbar, discounting the pressure loss this gives rise to a residual pump head of 100 mbar (Δp).

- In Diagram C) the primary return temperature for a given dispensing volume of 22 l/min and the selected flow temperature of 70 °C is 30 °C.
- In Diagram D) the secondary pressure loss for the given data is 180 mbar

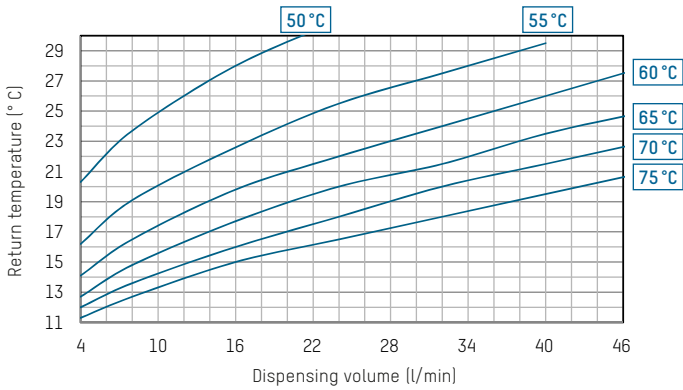

FLOW AND PRESSURE LOSS DIAGRAMS
COLD WATER HEATING AT 35K (10 ... 45 °C)

D) Secondary pressure loss

- 1 Pressure loss for cold water and circulation (secondary)
- 2 Circulation pump min
- 3 Circulation pump max
- 4 Primary pressure loss
- 5 Pump characteristic primary side

C) Return temperatures

A) Cold water heating at 35K

B) Residual head

NOTE

REQUIREMENTS FOR FLOW MEDIA

The units use a copper-soldered stainless steel plate heat exchanger as standard. It must be checked prior to use in the framework of system planning whether the issues of corrosion protection and scale formation have been sufficiently taken into account in accordance with DIN 1988200 and current drinking water analyses according to DIN EN 8065. See datasheet „Plate Heat Exchanger Requirements - Limit Values for Drinking Water Quality“.

ACCESSORIES

COMPONENTS FOR REMOTE ACCESS

Order no.	Rp	Description
296.7027.000		eLink ModBus RTU interface
296.7028.000		eLink RC7020 interface

ACCESSORIES FOR CASCADES

Order no.	Rp	Description
295.0500.000		Basic construction kit
295.0501.000		Extension kit
296.7024.000	1 1/4"	External storage restratification
296.7025.000	2"	External storage restratification
296.0502.000		External circulation

SAMPLE ORDER

CASCADE MODULE

With integrated circulation and storage stratification
